

Lean Toolbox for Continuous Improvement

Inconsistent quality? Inventory issues? Spotty service? Late deliverables? Costs out of control? No matter what industry you're in, the need to train your employees to understand the necessity of continuous improvement has never been more important. At the completion of this highly interactive 8-step course, employees will understand the importance of extracting defects and maintaining quality while adding to your bottom line.

Outcomes:

- Understand the principles of Lean
- Understand valuestreaming mapping
- Apply Lean principle to daily management
- Apply Lean to your specific industry and workplace
- Identify defects and find solutions
- Learn to enhance your profitability

Lean training is customized to fit your unique requirements and skills needed in your business at a time that is convenient for you. Hold training in our facility, or we can bring the training to you.

Two Introductory Sessions-Cost Includes:

- Face-to-face consultation with Lean Trainer
- All materials and hand-outs
- Up to 12 employees (maximum 18)
- 4-hour session is \$3,900.00
- 10-hour session is \$8,900.00 (includes two trainers)
- For each employee over (12), please add an additional \$250.00

Lean Certification Program

This 56-hour program is offered at your place of business or here at Delaware County Community College. At the end of this dynamic program your employees will be able to apply principles of Lean to the everyday business environment. In addition, they will enhance their team building skills and develop facilitation techniques that will ultimately affect the company's bottom line.

Please call 610-359-5137 and ask for Frank Agovino for more details and costing.
